

Online Wishcraft Page Number Guide

As many leaders have discovered, the page numbers in the hard copy of Wishcraft do not match up with the page numbers in the online version, which makes it tricky for team members using the online version to know which pages to go to for the homework, so I've compared the two to create this page number guide. I suggest you print this out and have it ready for any of your team members who plan to use the online version of Wishcraft, which is at www.wishcraft.com. It will make their lives much easier!

Andrea
